The data of Japanese outbound travel are the numbers of arriving tourists in each destination country/region. There are country-by-country discrepancies in the method of statistical processing of the tourist arrival data.

¹Since data of Brunei have not been announced, they have not been included.

²Data are not presented in order to avoid double counting of travelers to ASEAN countries.

³Total is calculated by the ASEAN-Japan Centre by adding the figures of all countries in the source.

⁴Since data of Brunei and Thailand have not been announced, they have not been included.
