

Seminar on UNCTAD's World Investment Report (WIR) 2015:
Reforming International Investment Governance
(国連貿易開発会議 (UNCTAD) 世界投資報告説明会)

ASEAN-Japan Centre

The WIR 2015 with the main theme of “Reforming International Investment Governance” calls on the need for reform of international investment regimes. This UNCTAD report, which builds on last year’s theme of “Investing in the SDGs: An Action Plan” provides key policy recommendations with regard to international investment agreements for the consideration of countries at all levels of development. It also examines fiscal contribution of multinational corporations in developing countries, fiscal leakage through tax avoidance and the role of offshore investment links.

The Report also highlights the need of coherence between international investment and tax policy regimes whereby the two have a common fundamental objective of promoting and facilitating cross-border investment.
