

## Indonesia-Japan Online Investment Seminar (EV Supporting Industries in Indonesia)

### ASEAN-Japan Centre

ASEAN-Japan Centre is going to co-host an Indonesia-Japan online investment seminar on the Electric Vehicle (EV) Supporting Industries in Indonesia with the Embassy of the Republic of Indonesia and the Indonesian Investment Promotion Centre (IIPC).

Indonesia, as a key automotive producer in Asia, has the world's largest nickel reserves. With 22% of the global share, the Government of Indonesia intends to leverage its abundant nickel reserves to become the EV production hub of Southeast Asia by 2030. Indonesia aims to achieve the production of nickel ore-related products such as EV batteries through local production and establish a domestic battery supply chain. Toyota Motor in 2019 pledged to progressively invest \$2 billion in Indonesia over 4 years including the launch of electric cars production.

This webinar introduces the EV market trends and policies in Indonesia. Inviting Bluebird, one of the biggest taxi companies in Indonesia that uses EV over the last 5 years, this webinar also provides a snapshot of the EV landscape in Indonesia. It is our hope that this webinar will assist in your business operations.
